ROWLES SITE SOLUTIONS WASTE PROPOSAL

Tradies Waste Management

Below is a proposed list on the effective management of waste disposal on all project home builder worksites. It will help provide a safer and cleaner working environment.

Concreters

- Put timber and plastic waste in bag provided if bag unavailable in front corner of build.
- Concrete washed out where it can be picked up with loader.

Plumbers

- All waste in bag or in front corner of job if bag unavailable.

Framers

- All waste in bag.
- Long lengths that won't fit in bag to be placed along fence line.

Iron roofs

- Non-metallic waste in the bag.
- Sheeting offcuts and excess steel to be placed in a pile out the front next to bag.

Tile roof

- All tiles to be place in a pile accessible with a loader (not around water or gas meter or against fence, toilet or in a hole)
- All other waste to be placed in the bag provided
- All long lengths of timber that won't fit in bag to be placed along fence next to bag.
