

Ginninderry Garden Commons

There are numerous species that can be used based on community input, but some potential species are listed below.

Fruit trees - loquat, hazelnut, mulberry, Japanese raisin, pear, apple, almond, olive, persimmon, fig.

Shrubs - mountain pepper, salt bush, globe artichoke, currants, blueberry, jostaberry.

Herbs - lavender, comfrey, borage, native flax, chrysanthemum greens, fennel, rosemary, sage, oregano.

Ground cover - strawberries, chamomile, midyim berry, kangaroo grass, Corsican mint, warrigal greens.

Rhizosphere - Jerusalem arthichokes, wasabi, murnong, chocolate lily, asparagus, rhubarb.

Climbers - grapes, kiwi, kiwi berry, native raspberry, goji berry, scarlet runner beans.

A central location with all installations in one place and the potential for raised bed fruit tree installations to flow down Tredwell street.

Lots of green space retained for community use.

Installations include:

4 raised beds

2 orchard rows

2 food forests

1 herb spiral

The area around installations will be heavily mulched to suppress weeds.

No composting to occur on site.

Scale is 1:200 @A1
