2 TERMS OF PAYMENT

- 2.1 The Buyer must pay the Deposit to the Seller. The Seller agrees to accept the payment of the Deposit in two instalments as follows
 - (a) 5% of the Price by cheque on the Date of this Contract (**First Instalment**); and
 - (b) the balance of the Deposit (if it has not already been paid) by unendorsed bank cheque on the Date for Completion (**Second Instalment**);
- 2.2 Subject to clause 2.8 the Deposit (including the First Instalment) is released to the Seller and must be applied to the Price on Completion.
- 2.3 If the First Instalment of the Deposit is:

If the Seller does not terminate this Contract in accordance with this clause 2.3 then this Contract remains on foot, subject to this clause 2.3, until either the Seller terminates the Contract pursuant to this clause 2.3, or waives the benefit of this clause 2.3 pursuant to clause 2.6.

- 2.4 If the Second Instalment of the Deposit is not paid on time in accordance with clause 2.1 then the Seller cannot immediately terminate this Contract for the Buyer's breach of an essential condition. The Seller must make timing of the payment of the Second Instalment an essential condition of the Contract by serving on the Buyer a Default Notice requiring the Buyer to pay the Second Instalment within 5 Working Days after service of the Default Notice (excluding date of service).
- 2.5 For the avoidance of doubt, the Buyer must pay the full Price to the Seller, on or before Completion.
- 2.6 These clauses 2.1 to 2.6 inclusive are for the benefit of the Seller. The Seller may notify the Buyer in writing that the benefit of these clauses 2.1 to 2.6 inclusive is waived.

- 2.8 If this Contract is:
 - (a) rescinded; or
 - (b) terminated due to the default of the Sellerand the Buyer is entitled to a refund of the Deposit, then the Seller must refund the Deposit, or part thereof, within 15 Working Days.

The Ginninderry Project Vision can be read in full here: ginninderry.com/our-vision/

Your Responsibility

As a land owner at Ginninderry, you have become part of this Vision and the decisions that you make about the home that you build and the lifestyle you lead will impact your broader community.

You have a responsibility to communicate the requirements set out within this document to your builder, your architect and/or designer.

It is strongly recommended that you include provisions in your building contract to ensure that your builder is responsible for site and waste management and repairs to surrounding public areas including the verge, street trees, footpath and services damaged during construction.

You are required to turf and maintain your street verge.

Part 3:

Summary: Housing Design Requirements - The Village

The Village at Ginninderry represents a refined urban centre defined by architectural excellence and climate-resilient design. These Housing Design Requirements ensure that every home contributes to a cohesive, neighbourhood identity whilst assisting to provide healthy, low-cost living dwellings for its occupants.

A Vision of Contemporary Urban Living

Dwellings in The Village are designed to balance private sanctuary with active public engagement. The "Contemporary Urban" aesthetic prioritises:

- Architectural Rigour: Clean lines and articulated facades that reduce visual bulk.
- Urban Interaction: Prominent entries and vertical glazing that provide natural surveillance and a welcoming street presence.
- Human Scale: A clear hierarchy between public and private realms through the use of recessed terraces and usable porches.

Key Design Requirements

To protect your investment and uphold a high standard streetscape quality, mandatory requirements apply to dwelling design. A summary of Design Requirements include:

Feature	Requirement Overview
Roofing	Refined profiles including Gables (25 -35 degrees), Skillion (15 degrees), or fully concealed Parapets to all elevations. Mandatory roofing colours to promote reduction in Urban Heat Island Effect.
Glazing	Public-facing façades must feature modern window styles with a vertical emphasis (height > width). Sliding windows are prohibited on street-facing façades. Double glazing for thermal and acoustic performance.
Shading	A minimum eave depth of 600mm is required on all façades. Where eaves are not provided, integrated sunhoods or awnings must be provided.
Materials & Colours	A curated palette of high-quality masonry and complementary cladding to ensure visual integrity. Reduction in height of masonry elements and colours which align with the approved palette. Façades must utilise at least two complementary materials from the approved palette.
Entry & Porch	Every home must feature a usable, covered entry porch that is a minimum 1.5m x 2.1m with a separate pedestrian path to the front boundary.

Feature	Requirement Overview
Corner Blocks and Public Facing Facades	Dwellings with multiple public frontages must address all streetscapes with equal architectural quality and include wrap-around features like verandas or corner windows.
Garages & Driveways	Garages must remain secondary to the home's architecture to reduce dominance. Panel lift doors are required on any public-facing or laneway frontage.
Sustainability	Mandatory solar PV system, all electric dwellings, heat pump hot water systems, and rainwater tanks. Size/capacity of solar PV system and rainwater tanks are subject to block size.
Site Response	Dwellings must respond to natural topography, utilising split-level designs on sloping land to minimise retaining wall heights.
Fencing	Front courtyard fencing must be constructed of vertical aluminium battens in approved colours. Standard Colorbond fencing in the approved colour is required for inter- allotment boundaries.

Built-in Value and Occupant Wellbeing

Beyond these mandatory controls, Ginninderry advocates for dwelling performance. By investing in airtightness, high-performance insulation, and passive solar orientation, residents can achieve lower running costs and improved indoor air quality.

These choices foster long-term health benefits and create a resilient home that offers genuine value over minimum-standard builds.

A Shared Vision for The Village

By adhering to these design standards, your new home is contributing to Ginninderry's shared vision for a sophisticated, sustainable, and resilient urban community. These requirements ensure that every home in The Village benefits from a high-quality streetscape, enhanced privacy, thermal comfort and lower-cost living.

Prioritising architectural and environmental performance today ensures your investment can remain a sanctuary for years to come.

We look forward to working with you and your design team to bring your new home to life within The Village at Ginninderry.

Part 4: Design and Compliance Requirements

The Design Requirements in this document will be used to assess your Design Approval. This document can be used as a checklist for your design to ensure your new home is complying with The Village Housing Design Requirements.

1. Roof Design

Roof styles and pitches are refined to promote a contemporary profile, ensuring architectural consistency and harmony across the urban streetscape.

Homes must have a roof type that complies with the following:

- Gable roof with a minimum pitch of 25-35 degrees
 - Skillion Roof with a pitch of 15 degrees (or 2.5 degrees where enclosed by a parapet).
 - Parapets are permitted to Garages with a maximum parapet height of 3.5m from Finished Ground Level.
 - Parapets must fully conceal the roof form, returning down all elevations to fully conceal roof pitch and gutters.
 - Multi-storey homes may use complying parapet roof designs to the dwelling and garage.
 - Single storey homes are permitted complying parapets to garages only.
 - Faux and raked parapets are not permitted.
 - The roof of a dwelling or garage is not permitted to fall toward a side boundary where the boundary setback is less than 900mm.
 - Roofs to dwellings and garages within 900mm of a boundary must fall to the front or rear of the block (away from an adjoining inter-allotment boundary).
 - Other roof forms are not permitted within The Village.
- Duplex Blocks:**
- Duplex blocks must be an integrated design with an adjoining wall system. Roof falls must fall to the street or rear of block and not to inter-allotment side boundaries.
- ## 1.2 Roof Colour
- Roof colours in The Village are a curated selection of mid to light tones to assist in reducing the urban heat island effect. These specifically selected colours prioritise thermal performance and climate resilience while maintaining a sophisticated, cohesive aesthetic across The Village.
- Permitted roof colours are listed in the Exterior Material Palette in Part 5.
 - Permitted roof cladding styles are listed in the Exterior Material Palette in Part 5.
 - A single roof colour and roof cladding style must be used for the whole dwelling.
 - Roof colours outside of the Exterior Material Palette at Part 5 are not permitted in The Village.
- ## 1.3 Eaves, Awnings & Shade
- Cantilevered elements are designed to provide functional weather protection and solar relief while adding essential depth and shadow to the building's exterior.
- Eaves must have a minimum depth of 600mm on all facades of the dwelling. Eaves depth is measured from the outer face of cladding/masonry.
 - Where eaves are not provided, windows and doors to any conditioned room are required to have a sunhood, awning or pergola for solar and weather protection on all facades of the dwelling.
 - Consider the use of projections and cantilevers to upper floors to provide shading to lower floor windows and doors.

1.4 Windows and Glazing

- Glazing configurations favour a clean, modern aesthetic with a vertical emphasis to draw in natural light and enhance the home's contemporary proportions.
- Windows on primary street frontages, including sliding door units, must be more vertical in proportion (height > width).
- Sliding windows are prohibited on all public facing facades. Acceptable styles include awning, casement, and tilt & turn.
- Sliding doors on public facing facades must include a minimum of three sections (two-panel sliders are not permitted).
- Obscure windows are not permitted to front facing facades.
- Horizontal window slots are not permitted to public facing facades.
- Double glazing is required to all windows.
- Thermally broken aluminium or uPVC framed windows are strongly encouraged due to their exceptional thermal and acoustic performance in Canberra's climate.

1.5 Dwelling Entry

- All dwellings must feature a usable, articulated entry porch and a separate pedestrian pathway on their primary frontage to encourage public-private engagement and strengthen the sense of neighbourhood community.
- A covered entry porch with minimum dimensions of 1.5m x 2.1m is mandatory for all homes.
- Dwellings may be required to be setback further than the minimum allowable front setback to provide a useable porch area to the primary street frontage.
- Blocks with dual frontages to a laneway require a second entry point and from the laneway.
- Secondary porch entries to laneway frontages must be covered with a minimum dimension of 0.9m x 0.9m
- The front door of each dwelling must be clearly visible from a public street or laneway. For block frontages of 14.0m or less, entries to the side of the home may be considered on Architectural Merit.
- Entry posts and porch supports must be lightweight, masonry piers are not permitted. Timber or metal posts have a minimum dimension of 150mm x 150mm.
- A separate path from the front boundary to the porch entry is required for all dwellings.

1.6 Facade Composition and Materials

Dwellings must feature high-quality, well-proportioned facades that utilise articulation and varied materials to reduce building bulk. Every elevation is treated with architectural importance, contributing to the visual integrity of The Village.

Facade Articulation:

- Facade articulation must be provided in the design using wall offsets and projections including features such as blade walls, bay windows, shading and awning elements, decks and balconies.
- All sides of the dwelling must be treated with equal importance and comprised of equal quality materials.

1.14 Beyond the Minimum: Designing for Performance

Ginninderry encourages a shift in focus from large floor areas to the enduring quality and health of the home.

By prioritising airtightness, superior insulation, and high-performance glazing over non-essential aesthetic finishes, dwellings can achieve significantly higher thermal comfort and lower daily running costs.

Investing in multifunctional spaces over single-use rooms and passive solar design maximising the benefit of your block's orientation, you can ensure that your well designed, well-built home outperforms a building constructed only to minimum standards.

This approach fosters a healthier living environment with improved indoor air quality and long-term occupant wellbeing, creating a resilient home that offers genuine value and sustainable, low-cost living.

1.15 Merit Based Approval

In instances where a concept or design may not sit within the framework of these Design Requirements, a Merit Based Assessment may be considered.

The proposal will be assessed each of the below demonstrable criteria that encourage resilience, sustainability, innovation and architectural brilliance:

- Site Appreciation: the design must consider house siting, orientation of the dwelling, solar access and light penetration.
- Architectural Merit: the architectural detailing must be well resolved and understood, enhancing the building performance and offering a sustainable design approach not simply stylistic features.
- Sustainability: rainwater tank size, solar panel (PV) size, water fixture ratings, appliance ratings, slab edge insulation and window performance must be above the minimum standards set within this document.
- Efficiency: must achieve a NATEHERS rating of 8.0 or higher. Certificates will be reviewed by an accredited assessor as required.
- Innovation: innovative building technologies such as electric vehicle readiness, solar battery readiness, alternate void formers such as Blax or Visy pods, slab edge insulation or a lower embodied carbon design approach.

1.16 Construction Practices

As the land owner, you are responsible for the Construction Practices of your builder on your site. It is recommended that you include the following requirements in your Build Contract. This includes (but is not limited to) provisions to ensure that your builder is responsible for sediment and erosion control, site and waste management and repairs to surrounding public areas including the verge, street trees, footpath and services damaged during construction.

Ginninderry's Project Estate Manager will monitor sites during construction. If your building is seen to not be complying with the following requirements you may be provided with a warning letter or compliance bond deduction.

Temporary Site Fencing:

- On settling on your block, you should fence your site with temporary construction fencing to secure access and prevent dumping.

Sediment & Erosion Control:

- The measures shown on the approved Sediment and Erosion Control Plan must be established prior to commencing any construction.

Drainage:

- Adequate drainage must be provided to ensure that there will not be any concentrated overland flow from the block during or after construction.

- Adequate soil and stormwater management controls are maintained until the landscape on the block is established.

Air & Noise Pollution:

- All ACT Government requirements relating to air and noise pollution, including but not limited to the minimisation of dust, appropriate noise thresholds and hours of operation must be adhered to.

- Under no circumstance must waste material be burnt on site.

Construction and Demolition Waste:

- During construction on the block, builders must establish and maintain a waste enclosure or waste containment area on the block.
- All building materials and waste stock piles must be fully enclosed to prevent material being blown off the block.
- All building materials and waste stock piles must be located within the block and clear of verges. You must obtain approval from TCCS (Transport Canberra and City Services) if you wish to store material on the verge or other Territory owned land.
