As a requirement of your land contract, you will pay a Compliance Bond upon settlement of your block. The Compliance Bond helps to ensure that the house design and sustainability requirements are met in accordance with your approved plans. You have a responsibility to communicate the requirements set out within this document to your builder, your architect and/or designer.

It is strongly recommended that you include provisions in your building contract to ensure that your builder is responsible for site and waste management and repairs to surrounding public areas including the verge, street trees, footpath and services damaged during construction.

You are required to turf and maintain your street verge.

Part 2:

Design Approval Process

Phase 1: Pre-Design

Understand requirements before designing.

- Read and understand all mandatory Ginninderry requirements.
- Pay your compliance bond at settlement.
- Provide these Design Requirements and accompanying Building Resources to your builder and designer.
- Meet with the Ginninderry team to discuss concept plans before design approval submission.

Phase 2: Design Review

The Ginninderry Design Team will review your plans.

- Once you have your house plans, complete the Ginninderry Design Application Form.
- Your plans will be assessed by the Ginninderry Design Team against the Housing Design Requirements and provide a Design Review.
 - If non compliant – you will need to revise and resubmit your application (Any additional design changes and amendments will be at your own cost. Admin fees may also apply).

Phase 3: Design Approval

Get your home design formally approved.

- Once all items raised in the Design Review have been addressed, you can submit your plans for Design Approval.
- Submit your plans with all required plans and documentation listed on the Design Application Form Checklist.
- If approved, you will receive stamped plans and an approval letter.
- You will then need to submit your Ginninderry approved plans to your Building Certifier for Building Approval or to the ACT Government for Development Approval (as appropriate).

Phase 4: Construction

Build your home according to approved plans.

- Begin construction after receiving all approvals.
- Notify Ginninderry of any changes to materials or appliances listed in your application (your approved application will be used to assess compliance).

Phase 5: Compliance

Confirm the build matches your approved plans and requirements.

- After receiving your Certificate of Occupancy, submit a Compliance Bond Refund Form.
- Ginninderry's Compliance Officer will conduct an inspection to check your home matches approved plans.
- Compliance bond conditions must be met.
- Refer to "Compliance Bond" in your Land Sales Contract for conditions of Compliance Bond refund.
 - If Compliant and all conditions have been met:
 - Compliance Bond amount is refunded.
 - If non compliant:
 - Issues must be rectified at your cost.
 - Additional inspections may incur fees.
 - If you choose not to rectify, the bond may be retained.

Part 3: Design & Compliance Requirements

The following information outlines the Design Requirements for Multi-Unit housing in The Village.

Design Principle	Design Requirements
<p>Public Domain Interface</p> <p>Provide legible and attractive interfaces that achieve passive surveillance to public streets and lane-ways.</p>  <p><i>Surveillance of Public Domain</i></p>  <p><i>Clear entries behind courtyard walls</i></p>	<p>An entry door and entry porch to each dwelling is required to both the main frontage and the laneway frontage.</p> <p>Main frontages to streets and open space links must include a covered entry feature or portico with a minimum dimension of 1.5m x 1.5m.</p> <p>Laneway frontages must include a minimum 0.9(w) x 1.5m(d) articulated covered entry area.</p> <p>Blocks nominated with the rear laneway as the street address must have a front entry door, porch and mailbox to the laneway frontage.</p> <p>Windows fronting a public road from habitable rooms, balconies or decks overlook the public domain.</p> <p>Courtyard walls are to be provided to comply with the Belconnen District Specification and are required to be coordinated with all service requirements, including clearance to any water meters and free access to any electrical meter boxes.</p> <p>Where development frontages are adjacent to open spaces, parks, public walkways or located on a corner, the following requirements apply:</p> <ul style="list-style-type: none"> • Habitable rooms have windows to provide passive surveillance (i.e. no 'blank' facades) • Building entries and pathways are visible and legible from public domain. • Dwellings are a minimum of two storeys
<p>Local Character and Context</p> <p>The built form, articulation and scale relates to the local character of the area and its context.</p>	<p>The design should sit comfortably with the Strathnairn and Macamara Master Plan. Multi-Unit blocks are located near to the proposed future local centre for Strathnairn & Macnamara. The design must provide a high quality, well articulated and active street frontage to the public domain.</p> <p>The design should respond to its orientation and provide private open spaces that utilise the site's assets, provide links and connections from the precinct to adjacent open spaces and thoroughfares.</p>

Courtyard spaces should allow natural light and cross-ventilation to living spaces

Design Principle	Design Requirements
------------------	---------------------

Landscape Design

The landscape design requires healthy plant and tree growth space for medium and large sized trees.

Minimum planting area and dimensions - refer to Residential Zones Technical Specifications.

The landscape plan proposes a combination of tree planting, for shade, mid height shrubs, lawn and ground covers.

Include a mix of species that are appropriate for scale and shading.

Synthetic or artificial grass is not permitted

The verge areas between the front boundary of the land and the kerb must be turfed.

Refer Appendix E for suggested Landscape Planting Palette.

Fencing & Landscaping Elements

Gardens integrate seamlessly with the public realm through the use of natural materials, structured fencing, and soft landscaping. A fencing plan must be

provided with your application demonstrating the following required fencing and landscaping elements:

- A separate path from the block’s front boundary to the porch area must be provided to each dwelling.
- A stone or masonry mailbox must be provided to each dwelling. Prefabricated mailboxes are not permitted.
- Front courtyard fencing, including the height, setback, length and material is allowed where permitted in accordance with the Planning (Exempt Development) Regulation and the Approved SDP Plan.
- Front courtyard fencing must be constructed of 40mm x 40mm vertical aluminium battens face fixed to top & bottom rails with 40mm spacing between battens in a colour listed in the Exterior Material Palette at Part 4.
- Side gates and side fences facing the street must be constructed of aluminium battens with a minimum 10mm gaps between battens to a maximum height of 1.8m and setback 1.0m behind the building’s facade in a colour listed in the Exterior Material Palette at Part 4.
- Inter-allotment fencing must be constructed at natural ground level using Colorbond “Neetasceen” panels with a maximum height of 1.8m in the colour “Dune”
- The Buyer must lay turf or plant and establish grass seed to a coverage level equivalent to turfing, in the verge areas between the front boundary of the Land and the kerb.
- The use of synthetic grass is not permitted in any location on your block.

Design Principle**Visual Appearance and Façade Articulation**

To promote well designed buildings of high Architectural quality that contribute to the local character.

The facades of the multi-unit homes must be designed as an integrated pack to provide an consistent streetscape.

**Design Requirements**

The development is to incorporate articulation to frontages and laneways.

The following elements help to provide functional articulation. The design must demonstrate how it responds to this requirement by incorporating the following:

- A minimum of two storeys
- A covered entry feature or portico is mandatory to main frontages and laneways.
- A cantilever of 1.0m of the upper floor over lower floors is mandatory where a balcony is not provided
- A balcony, deck, pergola, terrace, or verandah
- Awnings, sunhoods, and louvres
- Eaves and vertical shading to western windows
- Screens to service/ ancillary systems
- Blade walls and building projections
- Consideration of integration/ placement of downpipes
- Extruded box window treatments
- Access ramps as required

The overall streetscape must have a light base colour as the prominent wall finish with light weight cladding and include a mix of materials to provide articulation.

Double storey designs must incorporate balconies at bookends/corners with a combination of solid and perforated metal or glass balustrades.

Facade glazing to street frontages must be more vertical in proportion with mullion spacing less than 1.0m. Openings of 2.4m wide or more must be a minimum of 3 panels.

Metal profile cladding systems or FC style boards with profile widths of a maximum 200mm are encouraged.

Visual Appearance and Articulation to Building and Block Corners

Refer to the block planning controls.

Articulation elements such as balconies, blade walls, pergolas, sunhoods, awnings, façade treatments, material use and expressed structure are required to add visual interest and avoid large blank wall planes to prominent corners.

Buildings may need to be stepped back further on corners to permit balconies, glazing and larger eaves without encroachment into secondary front setbacks. All materials must wrap around the corner dwellings by at least 5 metres.

Sunhood and Awning

Light filled screened balconies.

Clearly articulated facades add value and character to the streetscape

Passive Surveillance with articulated and screened balconies

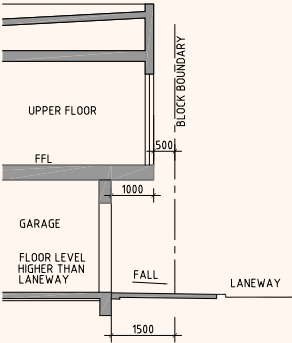

Clearly articulated facades add value and character to the streetscape

- Alternate facade colours and cladding materials may be considered if they align with the Exterior Material Palette and have a solar absorbance of less than 0.65.
- Material changes are not permitted on external corner joints. Facade materials must return around the corners of dwellings to an internal corner joint, or a minimum of 5.0m.
- Large areas of rendered finishes are not permitted without relief by either articulation or alternate materials.
- The use of foam cladding materials is strongly discouraged. Where proposed, a maximum of 15% of the dwelling’s façades may comprise of foam cladding elements.
- External brickwork must be constructed using a smooth-faced, single-colour brick in neutral, mid-grey to earthy tones consistent with the Exterior Material Palette at Part 4 and sample colour schemes provided.
- Bricks must present a uniform finish, with minimal tonal variation, no heavy texturing, mottling, or multi-coloured blends.
- All proposed bricks must be submitted for approval.
- Brickwork is permitted to the lower floor level and garage only.
- Exposed concrete slab edges to dwellings, porches and alfrescos are not permitted.
- Tiled, stacked stone, or stone cladding applied elements are not permitted in The Village.
- Downpipes are not permitted to be located on porches and must be integrated within architectural elements such as blade walls.

Design Principle	Design Requirements

If any future higher specification requirements are provided by the National Construction Code or ACT Government Territory Plan, the requirements from the National Construction Code or ACT Government Territory Plan take precedence

Retaining Walls

Extensive earthworks should be limited where possible to minimise the extent of retaining wall costs and the visual impacts to the streetscape.

Minimum Requirements:

- The height of site cuts along the side boundaries with attached neighbouring wall cannot exceed 500mm in height
